

Join the Fun at Oak Crest's Halloween Bash and Light-filled Night!

By Marc Baum, Oak Crest Institute of Science | Photos by Paul Webster

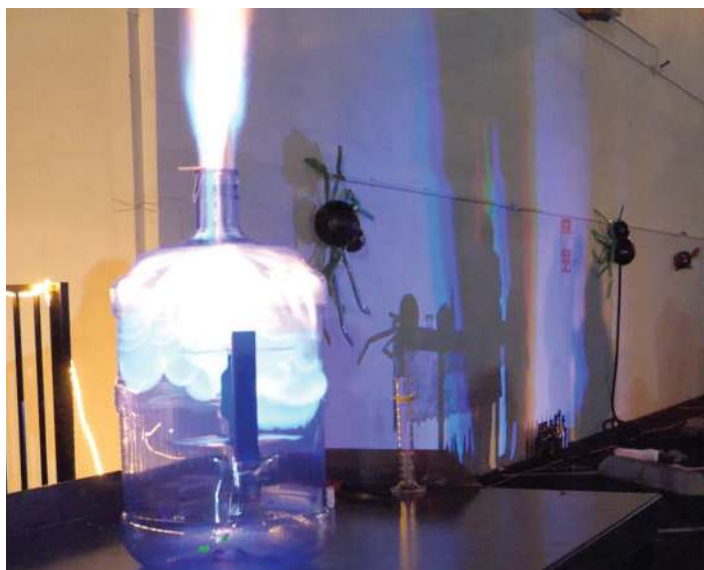

Hello there! You might have read our previous articles about the cool stuff our students do in our research labs. But did you know we also have a fun and light-hearted side? Halloween is one of our favorite times of the year, and we can't wait to share the excitement with you.

Every year, our team eagerly joins the City of Monrovia Halloween Bash at Library Park Green. It's a fantastic event! We bring along a bunch of awesome science-related activities that are both entertaining and educational. Picture this: we have microscopes showing off bugs and worms up close, flasks that bubble and froth, magical genies in bottles, and our super special Spectrascope. It's like a mini science fair right there for everyone to enjoy. Plus, we get to dress up in fun costumes that make the event even more festive.

The best part? You're invited to come and join us! It's a chance for you to see our cool activities and have a casual chat with us about what we're up to in our research. We love meeting visitors and sharing our passion for science. A big shoutout to the City of Monrovia for organizing this awesome event that brings the community together.

But wait, there's more! Halloween isn't just about the daytime fun for us. On a different day, and when the sun sets and darkness creeps in, we take our experiments outside. Imagine a parking lot filled with intriguing light displays, flashes of excitement, and even flames dancing in bottles. It's like a science-themed Halloween wonderland! The best part is, the crowd is smaller, so we have plenty of time to chat and get to know each other better.

This is an especially great opportunity for students who are curious about science. You can come talk to our scientists

Oak Crest Institute of Science (Oak Crest) is a 501(c)(3) non-profit organization established to teach and conduct cutting-edge science research. The institute provides an experience-giving role in education, where students work on authentic, funded research projects and develop a sense of belonging to the STEM community.

132 W Chestnut Ave, Monrovia, CA 91016

Phone: 626-817-0883 ~ info@oak-crest.org / www.oak-crest.org

and ask them anything you'd like to know about careers in the STEM fields (that's Science, Technology, Engineering, and Math). It's like a sneak peek into the world of science professions!

So, mark your calendars! Swing by our booth at the Halloween Bash toward the end of the month. And if you're up for more nighttime excitement, find us outside our building on West Chestnut for our evening Halloween event. We're really looking forward to meeting you, having great conversations, and sharing our love for science.

To learn more about what we do, our student activities, and the events we're a part of, hop over to our website at www.oak-crest.org. And guess what? This update is almost the final one from our Oak Crest laboratories. But don't worry, there are ways to keep them coming your way. Just drop us a line at media@oak-crest.org, to find out ways to keep Oak Crest in the news.

See you at Halloween Bash and beyond!.
