Admission & Parking: Free ! (Registration required)

About MOST-IP

MOST-IP is the **M**onrovia - **O**ak Crest **S**cience and **T**echnology **I**ncubator **P**rogram launched by the Oak Crest Institute of Science in collaboration with the City of Monrovia and Newton World Enterprises LLC. In 2019 MOST-IP received an i6 Challenge grant by the U.S. Economic Development Administration. MOST-IP is built and run by scientists for scientists to develop and mature early-stage discoveries into products and businesses by providing access to laboratory infrastructure, business services, scientific know-how and high-end equipment. We also provide seminars and workshops to teach scientists and students entrepreneurial concepts. Our goal is to support early-stage technology development in an agile, low-cost approach and link it to the research and workforce development Oak Crest is known for.
